BRI	3BR23CV023 XPÉRIMENT Tile ADVACED SUB ARRAY PROBLEM You are competing in a basketball contest. In this contest the score for each successful shot depends on both the distance	
J ² 3	You are competing in a basketball contest. In this contest the score for each successful shot depends on both the distance	30,4023
	from the basket and the player's position. The ball is shot N times, successfully. You are given an array A containing the	30
CYC	multiplying the position with the distance from the basket	
BR23CV	Your task is to find and return an integer value, representing the maximum possible score you can achieve by choosing a	3827
	contiguous subarray of size K from the given array.	323 3BRI
30,40233	Note:	
30101	* A subarray is a contiguous part of array.	304
	* Assume 1 based indexing.	3BR23CV
3BR2	* The array contains both negative and positive values.	
723 3V	* Assume the player is standing on a cartesian plane.	30,7073
	Input Format	3010
BR23CVC		
BRIBE	- input2 : An integer K representing the size of subarray	123 3BR2
)	- input3 : An array of integers	523°
3	- Inputs . An array of integers
